START WITH THE DECISION

A tidy brief still needs evidence.

An AI can help organise a property review. The reviewer still needs to see where each important statement came from.

START WITH THE DECISION

Start with the intended use.

NIST's AI Risk Management Framework links validity to evidence for a specific use. A polished summary is not enough to establish that a system is suitable.

START WITH THE DECISION

Give each claim a trail.

An original review template: claim, source, observation date and unresolved question. Keep a source link close to the statement it supports.

START WITH THE DECISION

Separate fact from interpretation.

Mark what the source actually reports. Label your inference separately. If the source is missing or does not support the statement, keep it unverified.

START WITH THE DECISION

Review the consequential parts.

NIST describes testing, monitoring and human intervention where needed. Decide which property claims require an official record or a qualified person to check them.

START WITH THE DECISION

Make the brief easier to challenge.

A useful property brief makes evidence and gaps easy to inspect. It should help someone review a decision, not hide uncertainty behind confident wording.
