

ONE CONNECTION. TWO COMPUTERS.

RESOURCE CONTROL / CONCEPT DEMO

SHARE SELECTIVELY

A virtual PC. Your real printer?

A connection can share more than a screen.

ONE CONNECTION. TWO COMPUTERS.

RESOURCE CONTROL / CONCEPT DEMO

Sharing creates a bridge.

Device redirection lets software in a virtual PC use selected local resources.

ONE CONNECTION. TWO COMPUTERS.

RESOURCE CONTROL / CONCEPT DEMO

PRINTER DEFAULT: OFF

The default just changed.

Microsoft's October update turns printer sharing off by default in VMConnect enhanced sessions.

ONE CONNECTION. TWO COMPUTERS.

RESOURCE CONTROL / CONCEPT DEMO

CLIPBOARD DEFAULT: ON

Clipboard sharing is different.

It stays on by default. Review each resource separately.

ONE CONNECTION. TWO COMPUTERS.

RESOURCE CONTROL / CONCEPT DEMO

ENHANCED SESSION ONLY

One feature. A specific scope.

This is about Hyper-V VMConnect enhanced sessions, not every remote desktop app.

SAVE THIS

BEFORE YOU DECIDE.

01 WHICH VIRTUAL PC?

02 WHICH RESOURCES?

03 DO I NEED EACH ONE?

Which virtual PC? Which resources? Do I need each one?
